

Standard operating procedure

Procedure: Guide for using Eclipse Live for drug monitoring and easy searching

Number: 1.1

Author(s): Rebecca Johns, Fiona Lee, Paige Trethewey. With thanks to Lucas Vajas and Steven Keclik of Eclipse Live for their technical support.

Date: 7 May 2021

Review date: 7 May 2024

Procedure overview

Guide to demonstrate how to access Eclipse Live, run searches within the system and how to obtain patient monitoring alerts

Requirements

Practices should have logins for Eclipse live and review how to use the data to improve safety within their practice

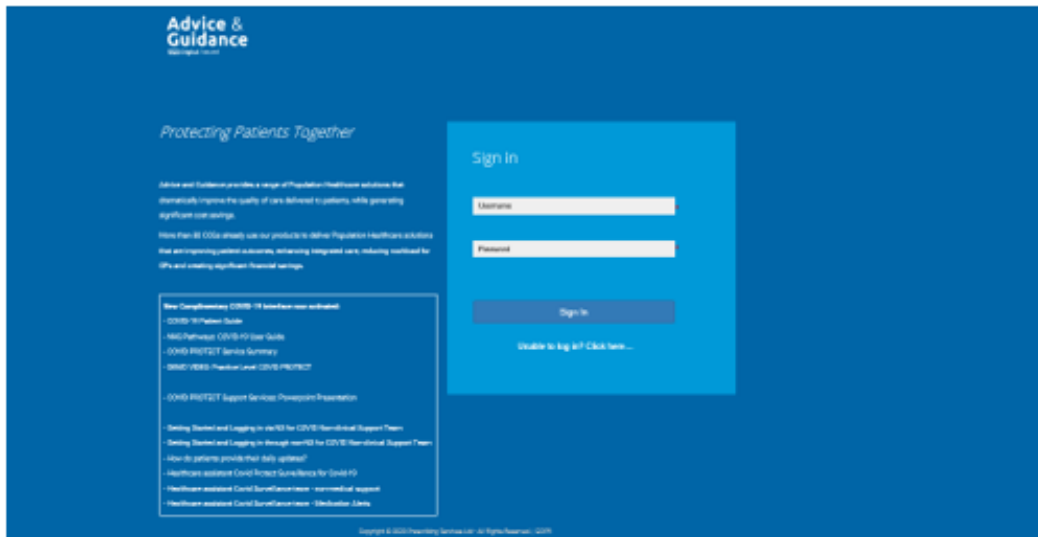

Procedure

ECLIPSE stands for: “electronic checking leading to improved prescribing safety & efficiency”.

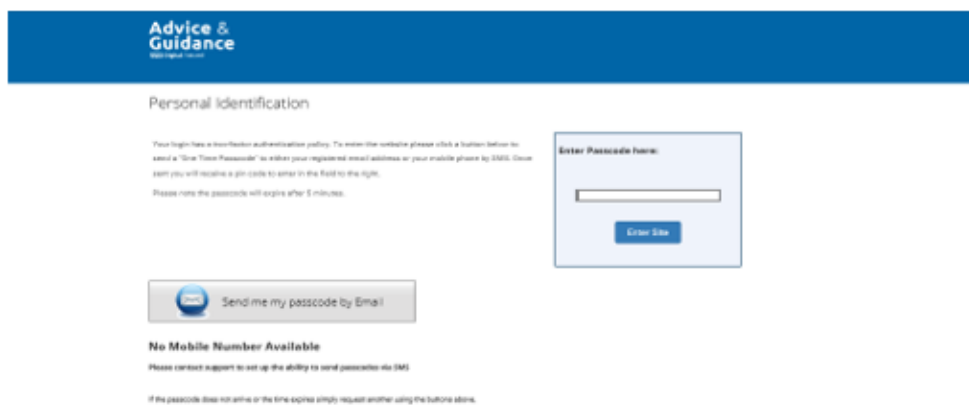

Eclipse Live is a risk stratification system which can be used to help identify patients who may be at an increased risk of harm. As well as the reducing admissions from drug associated reactions (RADAR) searches, the adhoc search function is useful for performing quick, efficient searches with or without specific criteria. Eclipse Live can be particularly useful for reviewing patient monitoring.

How to access Eclipse Live

Log on to the Eclipse Live system via [NHS pathways](#). Here you will need to enter your username and password on the first log in screen.

You will then be prompted to request a passcode. This will be set up to email the passcode to the email address registered with your account. You can also request the ability to have passcodes sent via text message to your mobile phone.

Select 'Eclipse Live'

Adhoc searches

Once logged into ECLIPSE Live select 'Eclipse Radar 500 (Red Alerts)'

Click 'search' on the menu bar. This will allow you to create adhoc searches and examples are given below.

Safety Report [May 20] [Alert Suite Request](#)

Alert Breakdown

Alert Breakdown

Alert Breakdown by Patient

Example search one:

Patients prescribed levothyroxine who have not had their thyroid stimulating hormone (TSH) checked in the past 12 months (this example is also one of the preset monitoring alerts)

SEARCH PARAMETERS		
Reset Search Page	Surgery: <input type="text" value="Surgery: [redacted]"/>	Search by Patient Ref: <input type="text"/> <input type="button" value="Find"/>
Search Criteria	Medication	Conditions
TSH <input type="text" value="TSH"/>	Must Contain ALL: <input type="text"/>	Must [Not <input type="checkbox"/>] Contain: <input type="text" value="Please Select"/>
Days Greater <input type="text" value="365"/>	Must Contain ANY: <input type="text" value="levothyroxine"/>	Must [Not <input type="checkbox"/>] Contain: <input type="text" value="Please Select"/>
<input type="text" value="Please Select"/>	Must NOT Contain: <input type="text"/>	*Must Contain ALL: <input type="text"/>
<input type="text" value="Please Select"/>	NOT in Past Drugs: <input type="text"/>	*Must Contain ANY: <input type="text"/>
<input type="text" value="Please Select"/>	Last Issued: more than <input type="text"/> days and less than <input type="text" value="90"/> days	*Must NOT Contain: <input type="text"/>
Only show top: <input type="text" value="1000"/> Results (Leave blank for all)	Show: <input checked="" type="radio"/> All Drugs <input type="radio"/> Only Repeat Drugs <input type="radio"/> Only Acute Drugs	*Days between: <input type="text" value="0"/> days and <input type="text" value="730"/> days
<input type="button" value="Search"/>		

Be aware that searches are pre-set to look for the top 1000 patients at the practice – it must be blank for the search to cover all patients

Only show top: <input type="text" value="1000"/> Results (Leave blank for all)
<input type="button" value="Search"/>

Example search two:

Patients prescribed ramipril who have not had their estimated glomerular filtration rate (eGFR) checked in the past 12 months and whose blood pressure is above the target

SEARCH PARAMETERS		
Reset Search Page	Surgery: <input type="text" value="Surgery: [redacted]"/>	Search by Patient Ref: <input type="text"/> <input type="button" value="Find"/>
Search Criteria	Medication	Conditions
eGFR <input type="text" value="eGFR"/>	Must Contain ALL: <input type="text"/>	Must [Not <input type="checkbox"/>] Contain: <input type="text" value="Please Select"/>
Days Greater <input type="text" value="365"/>	Must Contain ANY: <input type="text" value="ramipril"/>	Must [Not <input type="checkbox"/>] Contain: <input type="text" value="Please Select"/>
BP Systolic <input type="text" value="BP Systolic"/>	Must NOT Contain: <input type="text"/>	*Must Contain ALL: <input type="text"/>
<input type="text" value="Please Select"/>	NOT in Past Drugs: <input type="text"/>	*Must Contain ANY: <input type="text"/>
<input type="text" value="Please Select"/>	Last Issued: more than <input type="text"/> days and less than <input type="text" value="90"/> days	*Must NOT Contain: <input type="text"/>
Only show top: <input type="text" value="1000"/> Results (Leave blank for all)	Show: <input checked="" type="radio"/> All Drugs <input type="radio"/> Only Repeat Drugs <input type="radio"/> Only Acute Drugs	*Days between: <input type="text" value="0"/> days and <input type="text" value="730"/> days

It is easy to add extra criteria such as additional drugs, monitoring (for example, eGFR), conditions and/or patient specifics to the adhoc search parameters by using the drop-down menu boxes. By simply selecting the specific searching criteria required this will refine the results to a concise list of patients meeting those criteria and by doing so this can significantly reduce time reviewing results of searches. The concise list of patients will include the date and test results and this list can also be downloaded to an excel spreadsheet.

Example search three:

Patients on ramipril and bendroflumethiazide, over 80 years old, who have not had their eGFR checked in the past 12 months and whose blood pressure is above the target.

SEARCH PARAMETERS			Surgery: ALL			Search by Patient Ref: <input type="text"/> Find		
Search Criteria			Medication			Conditions		
			Separate drugs with a comma to add more than one to any boxes below			Separate readcodes with a comma to add more than one to any boxes below		
Age	>	80	Must Contain ALL:	ramipril, bendroflumethiazide	<input type="checkbox"/> Use BNF	Must [Not <input type="checkbox"/>] Contain:	Please Select	
eGFR	Days Greater	365	Must Contain ANY:		<input type="checkbox"/> Use BNF	Must [Not <input type="checkbox"/>] Contain:	Please Select	
BP Systolic	>	150	Must NOT Contain:		<input type="checkbox"/> Use BNF	*Must Contain ALL:		
BP Diastolic	>	90	NOT in Past Drugs:		<input type="checkbox"/> Use BNF	*Must Contain ANY:		
Please Select	Select		Last Issued: more than <input type="text"/> days and less than <input type="text"/> 90 days			*Must NOT Contain:		
Only show top: 1000 Results (Leave blank for all)			Show: <input checked="" type="radio"/> All Drugs <input type="radio"/> Only Repeat Drugs <input type="radio"/> Only Acute Drugs			*Days between: <input type="text"/> 0 days and <input type="text"/> 730 days		
Show / Hide Create Search Panel			<input type="button" value="Search"/>					

Before searching it is important to check when the last data import occurred to ensure you are working with up-to-date information. The import date can be found on the search page above the search parameters box, as shown below:

Last import date: 08/05/2021

SEARCH PARAMETERS			Surgery: Surgery			Search by Patient Ref: <input type="text"/> Find		
Search Criteria			Medication			Conditions		
			Separate drugs with a comma to add more than one to any boxes below			Separate readcodes with a comma to add more than one to any boxes below		
Please Select	Select		Must Contain ALL:		<input type="checkbox"/> Use BNF	Must [Not <input type="checkbox"/>] Contain:	Please Select	
Please Select	Select		Must Contain ANY:		<input type="checkbox"/> Use BNF	Must [Not <input type="checkbox"/>] Contain:	Please Select	
Please Select	Select		Must NOT Contain:		<input type="checkbox"/> Use BNF	*Must Contain ALL:		
Please Select	Select		NOT in Past Drugs:		<input type="checkbox"/> Use BNF	*Must Contain ANY:		
Please Select	Select		Last Issued: more than <input type="text"/> days and less than <input type="text"/> 90 days			*Must NOT Contain:		
Only show top: 1000 Results (Leave blank for all)			Show: <input checked="" type="radio"/> All Drugs <input type="radio"/> Only Repeat Drugs <input type="radio"/> Only Acute Drugs			*Days between: <input type="text"/> 0 days and <input type="text"/> 730 days		
<input type="button" value="Search"/>								

The search function contains the following possible criteria in the medication and condition section, which may require further explanation for new users:

- Must contain all
- Must contain any

- Use BNF (British National Formulary)

Medication			
Separate drugs with a comma to add more than one to any boxes below		Separate read	
<input type="checkbox"/>	Must Contain ALL :	<input type="text"/>	<input type="checkbox"/> Use BNF Must [Not
<input type="checkbox"/>	Must Contain ANY :	<input type="text"/>	<input type="checkbox"/> Use BNF Must [Not
<input type="checkbox"/>	Must NOT Contain:	<input type="text"/>	<input type="checkbox"/> Use BNF *Must
<input type="checkbox"/>	NOT in Past Drugs:	<input type="text"/>	<input type="checkbox"/> Use BNF *Must
<input type="checkbox"/>	Last Issued: more than <input type="text"/> days and less than <input type="text"/> days	<input type="text"/>	<input type="checkbox"/> Use BNF *Must

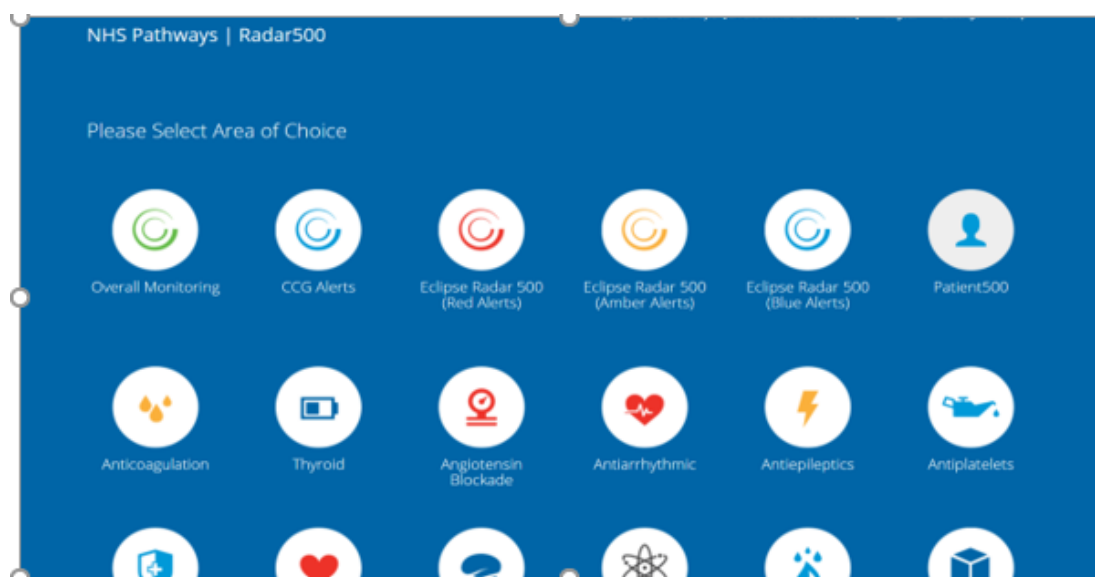

If the user were to include drug 1, drug 2, drug 3 (comma separated) in must contain all - then this would include those patients on all these 3 listed medications.

If the user were to include drug 1, drug 2, drug 3 (comma separated) in must contain any then this would include those patients who are on at least one of these 3 listed medications (and not essentially all 3 medications).

There is also a box that a user can tick to 'Use BNF'. The 'Use BNF' selection (checkbox) allows the extending of the medication search to include any medication in the same BNF classification. For example, if the user were to include pravastatin - and the user selected 'Use BNF' then this would also include any medications in the same BNF classification (lipid-regulating drugs).

Reviewing pre-set patient monitoring alerts

Once logged into Eclipse Live select 'Overall Monitoring'. This will give a brief trend analysis of how the practice alert breakdown is compared to the other practices in the NHS Kernow Clinical Commissioning Group (NHS Kernow).

Scroll to the bottom of the page and select one of the Eclipse Radar 500 monitoring icons (priority, amber or blue monitoring). The blue monitoring module also contains prescribing safety indicators. Alternatively, the Eclipse Radar modules can also be selected from the Eclipse Live front page as shown in the image above.

Dementias (ACI)	14	13 (92.86%)	9 / 13
Diabetes	236	205 (86.86%)	19 / 21
Diuretics	194	185 (95.36%)	6 / 21
DMARDs	29	19 (65.52%)	8 / 21
Immunosuppressant Agents	14	5 (35.71%)	3 / 21
Lipid Regulation	687	685 (99.71%)	3 / 21
NSAIDS	96	93 (96.88%)	2 / 21
Respiratory	247	246 (99.60%)	6 / 19

Monitoring

Eclipse Radar 500
(Priority Monitoring)

Eclipse Radar 500
(Amber Monitoring)

Eclipse Radar 500
(Blue Monitoring)

This shows more detail on all of the alerts. There are 2 ways to access more detail:
 1 - View a list of patients with alerts and which alerts they are
 2 - View a list of alerts and which patients have that alert

For the examples below of alert breakdown by patient and alert breakdown the blue Eclipse Radar 500 (blue monitoring) icon was selected.

Alert breakdown by patient

You can see all of the patients who have an alert and which alerts they have by clicking the excel icon 'alert breakdown by patient'. This is useful if you want to identify patients with the most alerts.

Level Type Search Total Patients Reviewed

All patients are listed with all of the alerts that they have. (The number in Column A is the patient reference- removed for the example below)

C	D	E	F	G
Search 1		Search 2		Search
Diuretic: Caution: Loop Diuretic detected in patient with Hyponatremia (Sodium) Reviewed: NO Patient appears to be on a loop Diuretic which is contra-indicated in hyponatraemia. 1. Please validate that the patient's latest blood screen shows significant hyponatraemia and that they are still taking their loop		Angiotensin: Caution: ACE or ARB detected and hyponatremia (serum) Reviewed: NO Patient appears to be on either a ACE or ARB with hyponatraemia. 1. Please validate that the patient's latest blood screen shows significant hyponatraemia (<125) and that they are still taking their ACE or ARB (Amlisatan, Candesatan, Irbesatan, Losatan		
Antiplatelet: Caution: Multiple antiplatelet agents detected with anaemia (Hb) Reviewed: NO Patient appears to have anaemia and on multiple antiplatelet agents that can exacerbate the anaemia. 1. Please validate that the Patient's latest blood screen shows significant anaemia and that they are still taking their multiple		Antiplatelet: Caution: Antiplatelet agent detected with anaemia (Hb >=9 & < Reviewed: NO Patient appears to have anaemia and is on an antiplatelet agent that can exacerbate the anaemia. 1. Please validate that the patient's latest blood screen shows anaemia and that they are still taking their blood thinning agent		
Antiplatelet: Caution: Multiple antiplatelet agents detected with anaemia (Hb) Reviewed: NO Patient appears to have anaemia and on multiple antiplatelet agents that can exacerbate the anaemia. 1. Please validate that the Patient's latest blood screen shows significant anaemia and that they are still taking their multiple		Antiplatelet: Caution: Antiplatelet agent detected with anaemia (Hb >=9 & < Reviewed: NO Patient appears to have anaemia and is on an antiplatelet agent that can exacerbate the anaemia. 1. Please validate that the patient's latest blood screen shows anaemia and that they are still taking their blood thinning agent		
Anticoagulation: Priority Monitoring: Apixaban, Edoxaban or Rivaroxaban Reviewed: NO Patient appears to be on a tNOAC which is contra-indicated in severe renal failure and no recent creatinine blood test. 1. Please validate that the patient's latest blood screen shows renal failure and that they are still taking their NOAC (Apoxaban, Edoxaban		Diuretic: Priority Monitoring: Loop Diuretic detected in patient with renal failure Reviewed: NO Patient appears to be on a loop diuretic and due for monitoring. 1. Please validate that the patient is indeed on a loop diuretic (bumetanide, furosemide, torsemide) and that no recent creatinine test has been performed.		Anticoagulation: Monitoring: Apix Edoxaban or Dabigatran detected Patient appears to be on a NOAC; an recommended that ALT is monitored 1. Please validate that the patient is i Edoxaban or Dabigatran) and that no
Antiplatelet: Caution: Antiplatelet agent detected with severe anaemia (Hb < Reviewed: NO Patient appears to have anaemia and is on an antiplatelet agent that can exacerbate the anaemia. 1. Please validate that the patient's latest blood screen shows significant anaemia and that they are still taking their blood thinning				
Antiplatelet: Caution: Antiplatelet agent detected with severe anaemia (Hb < Reviewed: NO Patient appears to have anaemia and is on an antiplatelet agent that can exacerbate the anaemia. 1. Please validate that the patient's latest blood screen shows significant anaemia and that they are still taking their blood thinning				
Diuretic: Caution: Potassium Sparing Diuretic detected in patient with Reviewed: NO Patient appears to be on potassium sparing diuretics which are contra indicated in hyperkalaemia. 1. Please validate that the patient's latest blood screen shows significant elevation of potassium (>5.7) and that they are still taking		Diuretic: Caution: Thiazide detected in patient with severe renal failure (eGFR) Reviewed: NO Patient appears to have renal impairment and is on a thiazide. Thiazides are ineffective if eGFR is less than 30mL/minute/1.73m2 and should be avoided. 1. Please validate that the patient's latest blood screen shows renal		
Antibiotics: Caution: Nitrofurantoin		DMARD: Caution: Mycophenolate detected		

Alert breakdown:

18	Information	03/05/2020	Anticoagulation: Monitoring: Warfarin detected			

To see the list of patients with a particular alert click 'view'. This shows the alert criteria with a list of patients for that alert. Column A shows patient reference (removed in example picture below).

Ref	Sex	Age	Reviewed	Notes
	F	80	No	
	M	55	No	
	M	70	No	
	F	46	No	
	F	52	No	
	F	62	No	

In order to review the amber and red alerts select the amber or red monitoring icon from the Eclipse Live home page.

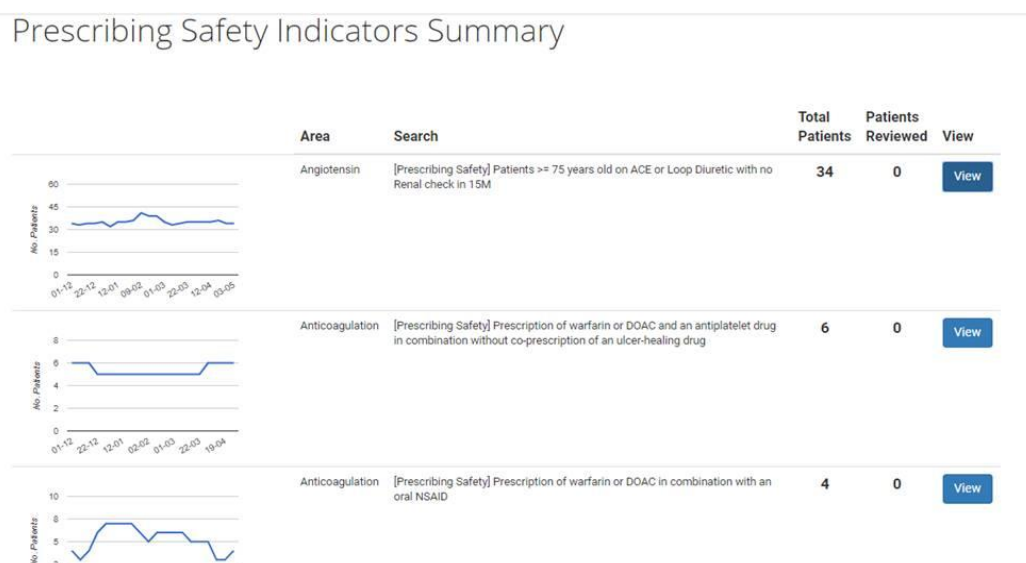

Prescribing safety indicator report

There is a prescribing safety indicator report available via Eclipse Live. This shows how many patients are meeting each of the prescribing safety indicators.

Once logged into Eclipse Live scroll to the bottom of the page and select 'Prescribing Safety'

To see the list of patients who are not meeting a particular prescribing safety indicator click 'view'.

User Guide

For further help, the user guide for the Radar Alerts can be accessed by any user by clicking the help button on the top right of the main page.
